Hogwarts School of Witchcraft and Wizardry

Project Documentation

http://kuratashoji.pythonanywhere.com/

Project Description

Hogwarts School of Witchcraft and Wizardry, or Hogwarts for short, is a directory where the information of Hogwarts students can be seen and edited. It provides the community with information about the characters of the fictional world of Harry Potter and gives them a chance to fulfill their childhood dream of applying to Hogwarts along with their favorite characters.

The students are classified based on their house: Gryffindor, Hufflepuff, Slytherin, and Ravenclaw. This is their way to gauge the student's potential in wizardry and personalities.
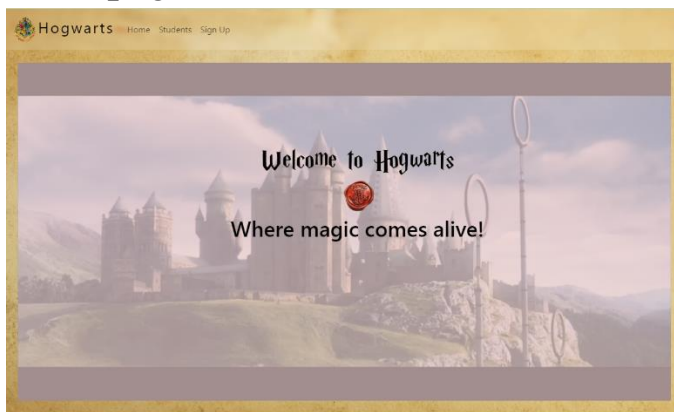

Project Features

To exhibit the student database, the information of students that can be viewed and collected are the following:

- House
- Student Name
- Birthday
- Image of Student
- Brief Description
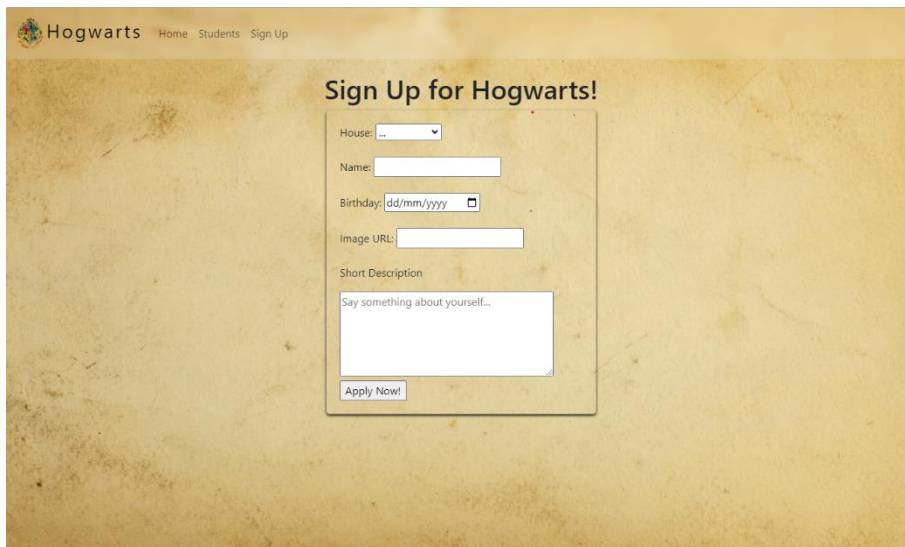

Sample Pictures of the Project
